

I-AM ETFs-Portfolio Select CZK (T)

Fund Description

State as of 31/03/2023

Active Approach - The I-AM ETFs-Portfolio Select invests in investment funds classified as sustainable, which must meet so-called ESG criteria (environmental/environmental - social/social - governance/corporate management), and therefore takes quantitative and qualitative decision-making factors into account. On this basis, a diversified portfolio consisting of different market segments, regions and sectors is compiled. The investment fund does not follow any benchmark and tries to reduce long-term losses through active risk management.

Flexible Asset Allocation - The I-AM ETFs-Portfolio Select is a flexible fund which seeks to achieve long-term growth in accordance with higher risks. The investment fund invests at least 51% of its fund assets in so called Exchange Traded Funds (ETFs) and can invest up to 100% of its fund assets in equity ETFs, depending on market environment.

Past performance figures and simulated performance do not constitute any reliable indicator of future performance. Every capital investment bears a risk. Prices may rise as well as fall. Issue and redemption fees have not been taken into account when calculating performance. Performance data have been calculated using the OeKB method. In case of an investment amount of 1,000 CZK, the investor will be required to pay a subscription fee of max. 57.50 CZK. This will accordingly diminish the performance of his investment. Any custody charges will further reduce the investor's return. Calculation provided by Cyberfinancials Datenkommunikation GmbH.
